

■ *International partner in commodity products...*

Introduction of AK Commodity Products Company Group

Honorable Respondent,

I, as Turkish Citizen and Businessman Aydın Ahmet Köprülü, started my business life on the year of 1991 and continued activities of commodity purchase and sales by founding my own companies on the year of 2015 in order to convey my international active business life in the field of commodity products to next generations.

As Ak Commodity Products Company Group, we carry out the heavy work based on certain agreements made with our new international business partners in order to advance further each day within the framework of planned targets towards the future through secure steps within the commercial business fields in questions as stated below.

The scope of our activities, in order, are;

- Purchase and Sale, Investment, Production, Storage, Harbor Management and Transportation Management of Petrol and Gas Products.
- Purchase and Sale, Investment, Production, Storage, Harbor Management and Transportation Management of Metal and Mining Products.
- Purchase and Sale, Investment, Production, Storage, Harbor Management and Transportation Management of Grains and Oil.

As group companies (İstanbul, Moscow, Geneve, Dubai, Singapore), we are planning for recording a turnover of 5-6 billion dollars in the direction of agreements made with customers and suppliers for trading purchase and sale targets of 2020 and then continuing our way with a 15-20% growth for each upcoming year.

At the same time, we are keeping an eye on the opportunities of production and management investments based on our aforementioned trading activities in question with the purpose of strengthening and expanding our group activity scope in a prospective manner and becoming an international brand.

We are in a heavy schedule for disclosing formations based on our accumulations and experience, incoming opportunities, supplier resources, customer relations, financial institutions, project partners and our own input in investment fields based on the entire aforementioned trading and management in question.

This introduction of past and future information has the purpose of briefing you, our honorable cooperation partners.

With kind regards,

Aydın Ahmet Köprülü

AK Emtia Ürünleri Ltd. Şti. (Ak Commodity Products Limited Company)

Chairman of the Group Companies

30 years of international active commercial experience ...

OUR HISTORY

To realize the direct sale of commodity products we have been trading, physically by providing directly from primary producers by way of distributorship – representation or franchise – agency, with the finance, product supply, market opportunities and 25-year international active commercial experience of our Company's founder, to its international customers.

It also carries out custody activities of the commodities which we have been trading with the merchandise stocks daily in commercial exchange and free zone, by working in collaboration with intermediary institutions and finance companies in international merchandise exchanges where commodity products are trading.

Our working and product quality standards are always professional and at a high level, and they are mainly delivering and submitting international 1st class commodities to buyer according to the market conditions within the undertaken period of time.

In the light of this philosophy and understanding, as international potential competitor and intermediate supplier, we focus on our targets with firm steps by starting out in line with our plans.

ORGANIZATIONS PHILOSOPHY

Starting from customer supplier, the process continued until the customers' customers are managed from a single source. Especially in Europe and Asia, including all the world may transfer realized land, air, using marine and railroad in a short time while maintaining superior quality, but also without compromising the unconditional customer satisfaction principle, all kinds until the arrival from the exit point serves to be your partner.

OUR MISSION AND VISION

Our vision

Across the country to provide the best production and service companies and spread to wider areas in the world with the same goal.

Our mission

way to achieving our target, using modern information and technology, the quality of our organization, transparency, participatory approach to the principle and all the business to offer a form of government in a way that will add value to our partners.

TARGET AND STRATEGIES

Our company has quality and service as “excellent reach” summarizes his passion.

Our company aims to become one of the successful companies in the industry are proud to serve our valuable customers.

Our quality policy

Our customer-focused approach and the constant need of our healing process principle; changing our customers, in order to obtain the evolving needs and ensure their expectations at the highest level and the best business results, continuously improving with the participation of employees of all business processes, quickly, producing an efficient and cost-effective solutions that can provide continuous development and progress, respect for ethical values, concessions from training not when a company is to create a culture that is highly competitive in the world.

CTRM MAJOR COMPONENTS

Commodity Trading & Risk Management System

RESPONSIBILITIES

Ak commodity company, we understand our customers' demands for accurate and high performance displays to produce solutions that meet expectations. Our promises, the quality of our work, we embrace our customers' systems and processes

ACTIVITIES

Our customer-focused approach and the constant need of our healing process principle; changing our customers, in order to obtain the evolving needs and ensure their expectations at the highest level and the best business results, continuously improving with the participation of employees of all business processes, quickly, producing an efficient and cost-effective solutions that can provide continuous development and progress, respect for ethical values, concessions from training not when a company is to create a culture that is highly competitive in the world.

R & D ACTIVITIES

Ak Commodity company, our most important year in the industries we serve, we are aware of our commercial expertise. Our expertise and operational for continued sustainable growth, we will invest in our technical and personal development. our customers, our business partners, our employees, and we export our state with the state "Trust" on board we create business relationships.

INVESTMENTS

We take responsibility for everything we deliver and completing, our is a success story. In short, we have to produce a permanent new values for the future of our country. A service philosophy of customer satisfaction in Focus Ak Commodity greatly differentiates from its competitors.

Commitment to ethical values, the environment, the importance given to occupational health and safety and patterns of behavior exhibited in this regard will ensure stable growth and sustained success of the Ak Commodities.

Crude oil and Gas

Crude oil	Diesel
Light Cycle Oil	Bass Oil
Fuel Oil	LPG
Mazut	LNG
Jet Fuel	Bitumen
Gasoline	Petroleum Coke

CRUDE OIL and GAS

Crude Oil

Crude Oil, Commonly known as Petroleum. It is a naturally occurring, yellow-to-black liquid found in geological formations beneath the Earth's surface. It is commonly refined into various types of fuels.

7

Light Cycle Oil

Cycle oil. Also known as: light cycle oil, LCO. Cycle oil is the diesel range product from the FCC unit. As a diesel blendstock, cycle oil is not very highly valued because of its high aromatics content, which gives it a low cetane. Typically, it is hydrotreated to raise its cetane and then blended into diesel.

Fuel Oil

Fuel Oil (M100) used in diesel engines is one of crude oil distillates. During the distillation of crude oil boiling range 200-300 ° C taken at the third main product Download diesel. Diesel is diesel fuel.

Mazut

Mazut is a viscous, dark and heavy fuel oil, which is used as a form of commercial fuel. It is mostly used in generating plants and factories.

CRUDE OIL and GAS

Jet Fuel

P54 is a type of jet fuel. It is designed for use with gas turbine engines for jet. color can be clear or straw colored. The most commonly used fuel for commercial aviation Jet A and Jet A-1 standard are produced to international specifications.

Gasoline

Gasoline, or petrol, is a colorless petroleum-derived flammable liquid that is used primarily as a fuel in most spark-ignited internal combustion engines. It consists mostly of organic compounds obtained by the fractional distillation of petroleum, enhanced with a variety of additives.

Dizel / Gasoil

Diesel fuel in general is any liquid fuel used in diesel engines, whose fuel ignition takes place, without any spark, as a result of compression of the inlet air mixture and then injection of fuel. Diesel engines have found broad use as a result of higher thermodynamic efficiency and thus fuel efficiency.

Base Oil

Base Oils are used to manufacture products including lubricating greases, motor oil and metal processing fluids.

CRUDE OIL and GAS

Liquefied Petroleum Gas (LPG)

Liquefied Petroleum Gas also referred to as simply Propane or Butane, are flammable mixtures of hydrocarbon gases used as fuel in heating appliances, cooking equipment, and vehicles. When specifically used as a vehicle fuel it is often referred to as autogas.

9

Liquefied Natural Gas (LNG)

to liquid form for ease and safety of non-pressurized storage or transport. The liquefaction process involves removal of certain components, such as dust, acid gases, Helium, water, and heavy hydrocarbons, which could cause difficulty downstream.

Bitumen

Bitumen is naturally occurring and is a black, sticky and highly viscous form of petroleum. It is so thick and heavy that it must be diluted or heated before it will flow. The primary use (70%) of Asphalt is in road construction, where it is used as the glue or binder mixed with aggregate particles to create asphalt concrete.

Petroleum Coke (Petcoke)

Petroleum coke, abbreviated coke or petcoke, is a final carbon-rich solid material that derives from oil refining, and is one type of the group of fuels referred to as cokes.

Industrial Metals

Aluminium Ingot

Copper Sheet

Brass Ingot

Titanium Ingot

Iron PIG

Hot Briquetted Iron HBI

Direct Reduced Iron DRI

Iron Ore

INDUSTRIAL METALS

Aluminium Ingot

Aluminum (Al Icon), ductile metal in silver color. Atomic number 13 species. Nature generally present as bauxite ore and is known for its superior resistance to oxidation. This basic feature lies in the resistance passivation. The arms industry many millions of different products are being used in the construction of a very important place in the world economy.

11

Copper Sheet

Atomic number 29, the density of 8.95, 1084 °C, right-soluble nature of free or available as combined heat and power forwards well beaten easily and used in any since ancient times is processed jobs, Copper called red-colored elements. (Symbol C) stop. Copper is reddish brown color of the close.

Brass Ingot

Brass is an alloy of copper and zinc. It is often used in musical instruments, as decoration or in plumbing. These ingots were made to test the consistency of the metals made by the manufacturer.

Titanium Ingot

Titanyum, Ti sembolü ve atom numarası 22 olan kimyasal bir elementtir. Gümüş rengi, düşük yoğunluğu ve yüksek mukavemeti olan parlak bir geçiş metalidir. Titanyum, deniz suyunda, aqua regia ve klorda korozyona karşı dayanıklıdır.

INDUSTRIAL METALS

Iron PIG

Cast irons are iron-carbon alloys containing more than 2% carbon content. Table of gray cast iron with carbon in the form of graphite, which is to form cemented called white cast iron. the melt temperature is 1150 ° C lower than the melting temperature of the steel.

12

Hot Briquetted Iron HBI

Hot Briquetted Iron (HBI) is a premium form of Direct Reduced Iron (DRI)* that has been compacted at a temperature greater than 650° C at time of compaction and has a density greater than 5000 kilograms per cubic meter (5000 kg/m³).

Direct Reduced Iron DRI

Below the melting point of iron ore at high rates by removal of oxygen (> 92) a solid product containing metallic iron (DRI, direct reduced iron, direct reduced iron or sponge iron, sponge iron) methods allowing to obtain "Direct Reduction Process" (D Processes) It has been called.

Iron Ore

High-grade and low-grade are divided into two groups according to structure transactions to make it suitable for smelting the ore for iron ore extracted from iron ore. They are subjected to a size reduction process only for high grade ores. The low-grade ore and gravity separation, magnetic separation, flotation, electrostatic separation, washing, calcination, leaching, are prepared using methods such as selective salkımlaştır up.

Food products

Sunflower Oil

Corn Oil

Palm Oil

Canola Oil

Sunflower Oil

Sunflower oil is the non-volatile oil compressed from the seeds of Sunflower plant. It is commonly used in food as frying oil, and in cosmetic formulations as an emollient.. The oil contains appreciable qualities of vitamin E, Sterols, Squalene, and other aliphatic hydrocarbons.

Corn Oil

Corn Oil (Maize Oil) is oil extracted from the germ of corn (Maize). Its main use is in cooking, where its high smoke point makes refined corn oil a valuable frying oil. Apart from serving as a less-than-ideal cooking oil, It also has several industrial uses, including as an addition to soap, salve, paint, ink, textiles, and insecticides.

Palm Oil

Refined Bleached Deodorized (RBD) Palm Olein is a clear yellow liquid oil at room temperature, which is a common product in the commodity market worldwide. RBD Palm Olein has different characteristics than the typical palm oil. Its commonly used as a cooking oil as well as a frying oil for food industries such as ready-to-eat food and snack food industries.

Canola Oil

Canola Oil is a vegetable oil derived from a variety of rapeseed that is low in erucic acid, as opposed to colza oil. It is the third-most widely consumed vegetable oil, after Soybean Oil and Palm Oil.
